Where We Are in the Cycle

Every ~800 years, the Saturn–Jupiter conjunctions cycle through all four elements — Fire → Earth → Air → Water → Fire — then shift into a new elemental era. Each era lasts roughly 180–200 years.

The United States was born in a **Fire** era (1776). It spent its entire arc inside the **Earth** era (1842–2020) — industrialization, railroads, steel, world wars, digital infrastructure.

The **2020 conjunction** marked an element shift into **Air**. Conjunctions will meet in Air signs (Libra, Gemini, Aquarius) until ~2219. The previous Earth → Air shift, in **1226**, brought universities, the Magna Carta, and Gothic architecture.

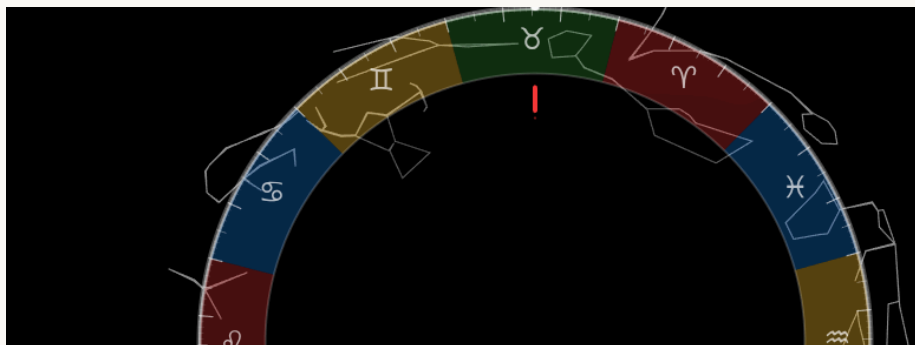

The 2020 shift arrived **244 years** after the founding of the USA.

Here is where you fit into that story.
